

IDEAS

① Grouped Bar Chart

② Stacked Bar Chart

③ Clustered Force Layout

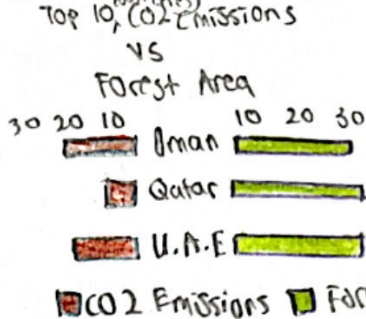

④ Treemap

⑤ Pictorial Unit Chart

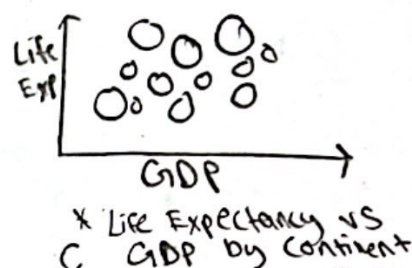

⑥ Butterfly Chart

⑧ Sankey Diagram

⑨ Scatter plot

⑦ Choropleth map

⑧ Proportional Symbol map

⑩ Pair Bar Chart

⑪ Boxplot

FILTER

- There are a lot of countries
- Treemap will be, compact
- World map charts does a better job

⑫ Sunburst Chart

- Not suitable for this data as I want to show which continents face water scarcity and not countries.

CATEGORISE

Top 10 countries for ^{most} CO₂ Emissions Vs forest area

Top 10 countries for ^{most} Forest Area Vs CO₂ Emissions

World Electricity Access

Annual Freshwater Retrieval

Life expectancy vs GDP

QUESTION

- Is CO₂ and Forest Area related?
- Can the general audience understand which continent is lacking?
- Is the visualisation bias?

COMBINE & REFINES

- ① Bar chart, ② Stacked Bar Chart, ⑥ Butterfly Chart, ③ Clustered Force Layout, ⑤ Pictorial Unit Chart
- ⑦ Choropleth map, ⑧ Proportional Symbol map
- ⑨ Donut Chart, ⑩ Sankey Diagram
- ⑪ Scatter plot, ⑫ Pair Bar Chart, ⑬ Boxplot

Author: Lpkxment a/l Sarawanan

Date: 10/10/2024

Sheet: 1

Task: Planning of Visualisations

LAYOUT

World Environment Indicators (2020)

Top 10 highest CO₂ Emissions Vs Forest Area

Top 10 highest countries Forest Area Vs CO₂ Emissions

World Access to Electricity (%)

Annual Freshwater Retrieval

Life expectancy Vs GDP

FOCUS

* Group Bar Chart is easy for side-by-side comparison
* The legend is a clickable filter to see trends

Title: World Environment Indicator Overview (2020)

Author: Lekmet a/l Saramanor

Date: 10/10/2024

Sheet: 2

Task: Design a scrollable-page with narrative

OPERATIONS

* Choropleth map

↳ No normalisation needed as it is already presented as percentage

↳ Add tooltips over each country when user hovers over them to show electricity access

↳ Tooltip must also show that the data of that country is not present if a user hovers over the "grey" colour country.

↳ Diverging Orange colour scale is used to show "electricity" and emphasize main continents that are lacking

DISCUSSION

Advantages:

↳ Visualisations are huge and can be easily clicked

↳ Annotations can be added clearly

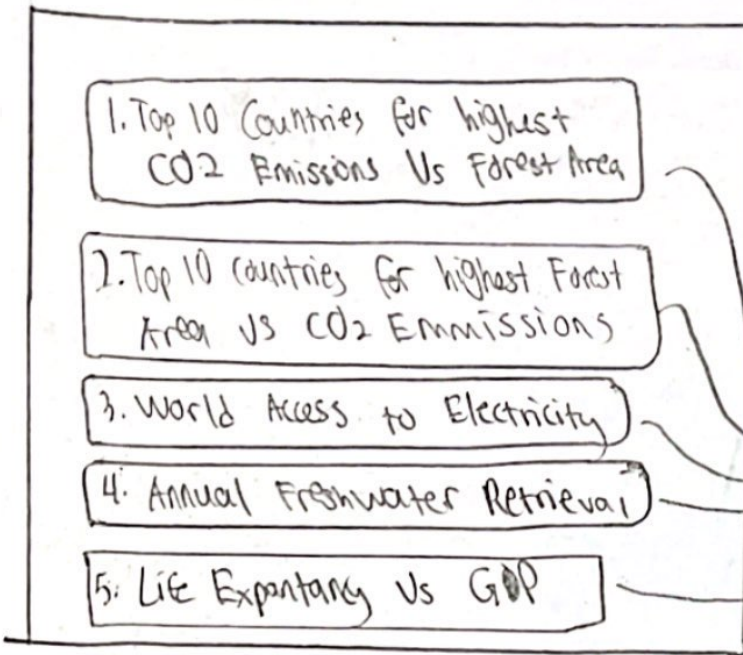

↳ User just as to scroll down

↳ Clear subtitles

Disadvantages:

↳ Tough to maintain side lines.

LAYOUT

Title: World Environment Indicators (W)

Author: Lekshment a/l Sarawanan

Date: 10/10/2024

Sheet: 3

Task: Designing webpages for each indicator

OPERATION

• This are all buttons to go to different indicators

↳ Need separate Html files for each indicator

↳ in the main page, index.html, need to provide the the links of the HTML Files

↳ A back button is used to go back to the main page (←).

↳ Or can use React framework from Javascript and create separate components for each navigator

① and ②

FOCUS

- Asia
- Africa
- North America
- South America
- Europe
- Oceania

Tooltips is added to show the continent that retrieves most Freshwater annually

→ Group by Continent and divide it by total Freshwater and times 100%

↳ Annotation for most continent

DISCUSSION

Advantages:

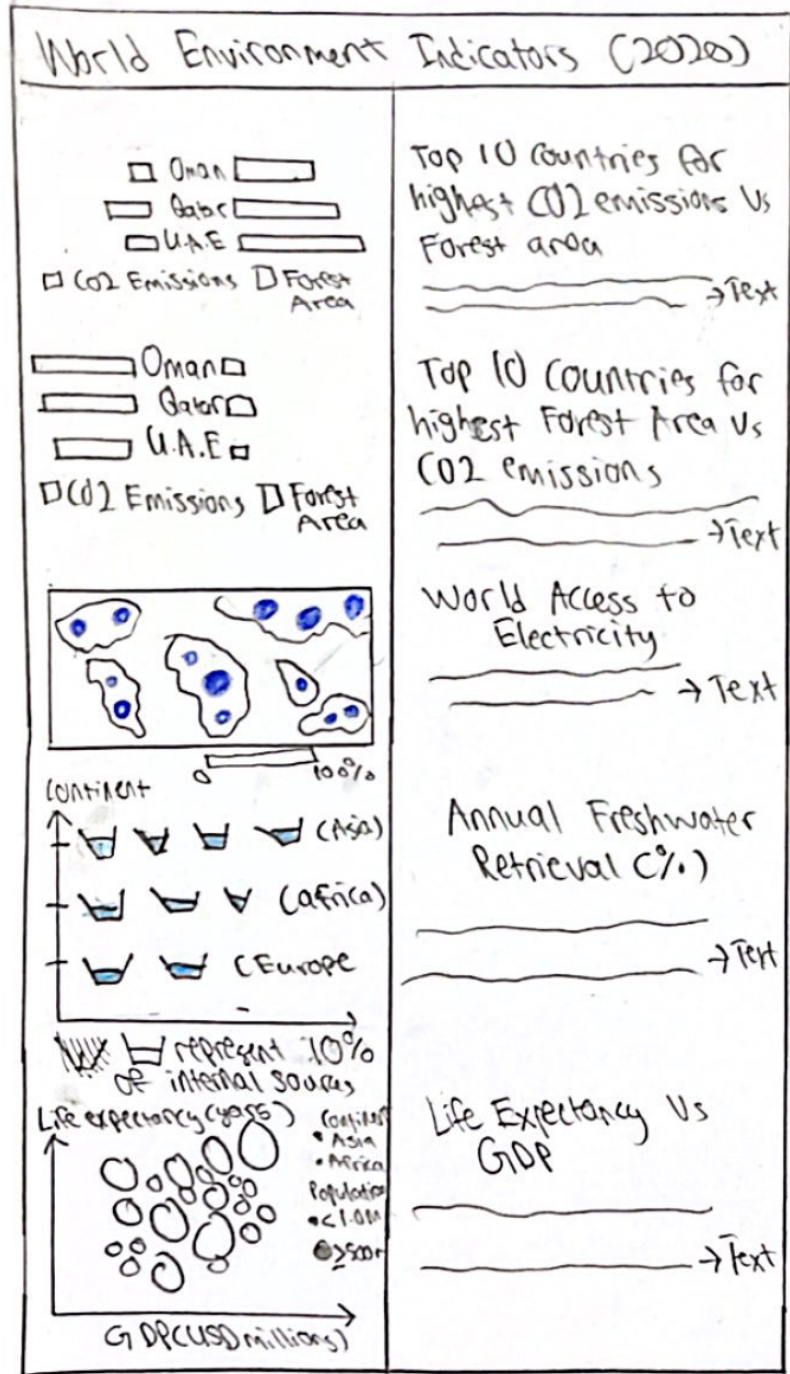

↳ Organized well into pages

Disadvantages:

↳ Can't do direct comparison between indicators

↳ may have too much of whitespace in page.

LAYOUT

Title: World Environment Indicators (2020s)

Author: Lekshmi A/I Sarawanan

Date: 10/10/2024

Sheet = 4

Task: Design left-aligned scrollable poster

OPERATION

↳ Tooltips for butterfly charts

↳ Legends in butterfly chart are clickable

CO2 Emissions Forest Area

Click!

to filter bars.

FOCUS

Scatter plot L.E (years)

Continent Selection:

☐ Asia
☐ Africa
☐ North America
☐ South America
☐ Oceania
☐ Europe

Continent

- Asia
- Africa
- North America
- South America
- Oceania
- Europe
- Population
- < 1.0M
- 1.0-10M
- > 50M

Can filter by continent

Additional Data: Population (size of data points)

Able to notice trends

GDP (USD millions)

DISCUSSION

Advantages:

↳ Good sight lines

↳ Quite clean look

Disadvantages:

↳ Some visualisations like the map needs bigger space so may disrupt visual hierarchy

↳ This may lead to a lot of whitespaces or the texts on the

LAYOUT

Top 10 countries highest CO2 emissions vs Forest Area

Top 10 countries highest Forest Area vs CO2 Emissions

World Access To Electricity

Electricity Access (% Population)

→ Text

Annual Freshwater Retrievals (% of internal sources)

Continent
Asia Africa Europe North America
South America Oceania

L.E (years)

FOCUS: - All charts here are important for users to understand the environmental condition
- Emphasis on annotation and tooltips

Title: World Environment Indicators Overview (2020)

Author: Lekhmet a/l Sarawanan

Date: 10/10/2024

Sheet: 5

Task: Design final scrollable webpage

OPERATION

Filtering:

- ↳ Selecting on legends for group bar charts
- ↳ Drop-down for continent filtering in chart

Tooltips:

- ↳ Used for all charts
- ↳ Bolded values

Annotations:

- ↳ Highest values in donut chart
- ↳ Country names in scatter plot

DETAILS

- Data transformation: Using pandas library (python) to get top 10 countries
- Data cleaning: Remove countries which have no data or indicate in chart

Estimated Time and Effort: 5 days

- ↳ One day for data collecting, transformation and cleaning
- ↳ 2 days for group bar charts
- ↳ 3 days each for rest of the charts

Specific Requirements:

- ↳ Subheaders must be clear
- ↳ Colours of continents must be clear
